
What about simply consuming less?

By Edward Lloyd – Dojo of Bonn

If something breaks and cannot be repaired, try living without it.

TV, answering machine, microwaves oven, washing machine and toaster? Mine were not replaced ...

Our electricity bill from Greenpeace for the last 12 months ? 315 KWH...

Be attentive to hidden emissions and not just these from bio diesel and electric scooters. Ironically, energy efficient lighting like LED and its misuse cause other problems.

Light emissions should also be regulated by law, just like smog, water pollution and soil contamination ...
