
Exhibition Zen and Art - Godinne 2013

A stunning art exhibition took place during the summer sesshin

Thanks to this initiative, artists from different backgrounds had the opportunity to exhibit their work

Eric Tchéou who travels the world with his camera and showcased the best of them, for the pleasure of our eyes.

Christian Gaudin whose book's drawings depict the practice of Cat-wisdom and the teaching of Buddha Cat- kyaminou.

Geneviève Gauckler and her subtle blending of movie and cartoons characters together with some friends and buddies sitting in zazen, result into fabulous posters for the Butsu Zen Zone at the Japan Expo!

By the way, it was confirmed to me that Georges Lucas (Creator of Star-Wars) did indeed inspire himself from the Zen to create the Jedi knights!

Pascale Lorge presented superb and huge paintings on fabric, so light that it felt like they were about to fly away.

An experience to be repeated without moderation !

Jean-Robert Gérard who let slip his Indian ink brushes on rice paper as on silk. In one stroke here is a fish, over there a bird with its baby, and up there the blowing wind.

The images of **Konrad Maquestieau** transported us in some Haïku, leaving no one indifferent.

Maya Ginet (8 years old) drew for the occasion a beautiful mandala.

Gisèle Couvreur led us along the canal du Midi through her impressionistic pointillism oil paintings, as accurate as the sewing of the Kesa !

A very popular exhibition with both the visitors who flocked and the artists who found there room, provided by ABZE, to express the practice of zazen through arts.
